Professional Experience

Senior Web Developer / Tech Lead
REFUGE Marketing and Consulting · Remote · July 2025 – August 2026

- Lead end-to-end delivery of high-priority web projects, overseeing development, QA, and release cycles under tight deadlines
- Led a development team of two developers, coordinating additional project-based resources when needed to meet tight project deadlines
- Architect and implement scalable solutions across WordPress and modern frontend stacks
- Own technical decision-making across concurrent projects and support pipelines
- Collaborate cross-functionally with design and stakeholders to translate requirements into production-ready builds
- Established QA and validation workflows, reviewing implementations against design specifications and identifying frontend, responsive layout, and functionality issues before release
- Troubleshoot complex technical issues across frontend, backend, and integrations

Senior Web Developer
Artistic Influence · Remote · Aug 2015 – May 2025

- Developed and maintained commercial themes across Shopify, Ghost, WordPress, and Tumblr, contributing to a catalog of approximately 51 Tumblr themes.
- Designed and developed selected themes from concept to completion, translating design concepts into responsive, production-ready websites.
- Built and customized Shopify themes using Liquid, JavaScript, and reusable frontend components.
- Developed custom Ghost themes using Handlebars, JavaScript, and modern frontend build tools.
- Supported customers through technical troubleshooting, theme customization, bug fixes, and ongoing maintenance.
- Modernized development workflows by implementing Git-based version control and improving asset compilation and build processes using Webpack, Vite, and Sass.

Web Developer
AJH Creative & Design, Inc. · Jun 2014 – Sep 2016

- Maintained and enhanced client websites, handling bug fixes, updates, and feature requests
- Integrated third-party services (e.g., reservations, forms, analytics) into client websites
- Provided client-facing technical support and resolved issues through ticketing systems
- Collaborated with designers and project stakeholders to implement updates efficiently

Web Developer
Syntactics Inc. · Mar 2012 – Jun 2014

- Developed and maintained websites across multiple CMS platforms including WordPress, Joomla, and Zen Cart
- Converted design mockups into responsive, functional web pages
- Assisted in backend development using PHP frameworks such as CodeIgniter
- Performed site updates, debugging, and cross-browser testing

Applications Developer
National Food Authority – Region X · Apr 2011 – Oct 2011

- Designed and developed internal tools, including an Official Receipt automation system
- Gathered requirements, created system workflows, and implemented solutions
- Provided maintenance and support for internal applications

Education

Bachelor of Science in Computer Science
Xavier University – Ateneo de Cagayan · 2011
Major in Information Technology
